

1. Smart Sleep Assistant Bed (ESP32 + NLP)

WHY (Purpose)

- Helps improve sleep quality
- Automatically adjusts environment (lights, fan, sound)
- Good if you have trouble sleeping or want better rest

WHERE (Placement)

- Bedroom

HOW (Usage)

- You say: "I'm going to sleep"
- System will:
 - Dim or turn off lights
 - Turn on fan or adjust temperature
 - Play relaxing sounds/music
- In the morning, it can:
 - Gently turn on lights
 - Play alarm or music

2. Smart Kitchen Safety & Automation System (ESP32-Based)

WHY (Purpose)

- Prevents accidents like gas leaks or fire
- Helps with cooking by automating tasks
- Reduces worry when leaving the kitchen

WHERE (Placement)

- Kitchen

HOW (Usage)

- ESP32 connected to sensors:
 - Gas sensor → detects leaks
 - Temperature sensor → detects overheating
- Automatically:
 - Sends alert to your phone
 - Turns off gas or appliances if danger is detected
- You can also control it remotely using your phone

Simple Summary

- **Device 1 (ESP32 + NLP)** → Better sleep and comfort (Bedroom)
- **Device 2 (ESP32)** → Keeps kitchen safe and automated (Kitchen)
